## A GOOD FEATURE AT BIJOU TODAY

One Million Dollars! At This Popular Playhous

At the Bijon today will be shows a very thrilling and entertaining picture entitled, "One Million Dollars."

Richard Duvall, a noted criminologist, while touring in India, saves the life of a Buddhist priest who re-wards him with the presentation of a wonderful crystal globe. By gasing in it the priest demonstrates that Duvali can fall into a cataleptic state and his astral body is released and is free to roam at will. Leaving the temple, Duvali collides with Grace Ellicott, who is touring the far east with her aunt, the Countess D'Estes and the count. A mutual admiration between Grace and Dayall results from the accidental meeting. Later, in New York, the mistress of

Count D'Estes makes financiai de-mands which he cannot meet. With his housekeeper, Mrs. Cooke, he plans to put his wife out of the way and thus obtain her fortune. Polson is put in candy which the countess eats. Her sudden death arouses the suspicion of her niece. On his return to New York Duvail experiments with the magic globe. He is surpris-ed and pleased to see the face of the girl he met in India. Further ex-periments, while in the cataleptic state, discloses part of the plot that the purpose of saving life, resulted in the death of Grace's aunt. "The Queen Mory was in the thickwhich has cheated her out of the fortune.

A white lie doesnt travel very far before it gets a black eye

Fight to Death With Both Sides Holding on Like Bulldogs Until the Germans Retired to Their Base.

MONG the British sailers who on their return told of the North sea mayal battle one describes a duel worthy of the Nelson tradition between the Invincible and a big German warship, the identity of which is uncertain.

"The two ships." he said. "fought like bulldogs, all guns firing at once and most of them hitting, with such an enormous weight of metal pouring out that the duel was bound to be short. It lasted less than thirty minutes.

"It was a fight to death, and both ships died. The German vessel burst thto flames and sank. Almost imme-diately afterward the Invincible followed her to the bottom. Both sank with their flags dying. The water was strewn with men dead and alive. But in the midst of the flerce fight it was impossible to arrest the activities for

est of the fight and did heavy damage. She then became the center of the con-verging fire of several powerful German ships. She broke in two and went

"The lot of the Indefatigable was very similar. She was in a smashing fight at close quarters. Then the life was blown out of her. The Warrior had to be abandoned at high sea after being towed for ten hours.

"The Warspite, which was one of the earliest vessels to return to the base, dashed between the Warrior and her enemies and received a salvo meant for the badly hit Warrior. She did not save the Warrior, but probably saved

Big Shells at Short Range. A survivor of the Warrior told this story:

than 0.000 yards, I should say. It was fair weather, but misr. A westerly gale had subsided. The entire German navy seemed out against us and all ships were firing as fast as they could

serve their guns.
"The whole sea looked like one bloody buttlefield. At such thort range you could acarcely miss. Great 14.2 inch shelfs were coming at us all the time. Some smashed clean through the ship, killing every man they touch ed. We engaged ship stier ship. We accounted for two light crowers and a

destroyer. We saw the Queen Mary blow up as a result of concentrated fire. It looked as if a magnature exploded. She broke in two and went down like a stone. It was all over in a couple of

"Right in the hottest of the battle it was impossible to pick up men out of the water.

"The Indefatigable went down much The inderatigable west down much the same way. Lie had given the enemy a pounding, and they gave the same to her. Our losses on the War-rior were few. We were badly holed. One of her engines was smarked, and

the others stopped.
"One of our ships took us into tow and drew us out of the line—a grand tit of work in the middle of shell fire and torpedo attacks. We should have resoled the base, I think, if the act hat not gone up. We shifted ships without any loss of life.

"All we want is another ship and another 'go' at the Germans, for they are jolly worth fighting."

## Describes the Battle.

Another survivor tells this story of

The battle cruiser squadron was shoving through the water at twenty-dve knots, destroyers and light cruisers in their appointed places. The sen was as smooth as a mill pend, the day was yarm, and a slight hake hung over the water. was warm, and a slight hase hing over the water. For well eigh sixteen hours the squadron steamed steadily on then the destroyer acreen reported the presence of eight cart, but significant perhaps of the presence of higger vessels. A smart little destroyer action was begin. A fight cruiser dashed up to assist, and good the first phase of the initie was in full swing. "Later the battle cruisers joined, and when the essent appeared with the full strength of his battle cruiser squadron all as elements of an evenly contested lattle wore present.

"But the readiness with which the Germans accepted the challenge must have set Admiral Bestty to thinking hard. The Germans are grow chase point of view it may be assume smough tection not to fight unless they are there in superior forces do not fight as

How the Big British Ships Were Sent to the Bottom. Warrior Abandoned After Fight to save Her.

demonstrate to their old enemy that they were very much alive. From the Tiger there went a shell which, as those in a position to observe reported, got one of the Derrflinger's turrets and wiped out a gun crew. Others were planted with equally deadly effect on the enemy, and unless the Tiger's men are greatly out in their calculations there is not much more likely to be heard of the Derrilinger.

"The battle reged with tremendous violence. The gir was filled with white hot steel, dust and silvers. Ears were deafened by the tromendana grash and clatter. If all the opposing forces remained as they were the result was inevitable.

"The battle cruiser action was fought with the enemy lying close to neutral Danish waters off Jutland. Everything was going well with Admiral Beatty when the four superdreadnoughts came up and rushed in to cut off the enemy from his southern base. Admiral Berity was then to drive in from the northeast and either force the Germans to shelter in neutral waters or to compel them to acce. .. the challenge of the heavy battleships

## Germans Re-enforced.

"The dirategy was excellent, but it was applied too late. From the south came, re-enforcements which provided the explanation of the phenomenon of the Germans accepting Admiral Beat-ty's challenge. From the south came the major portion of the German grand the major portion of the German grand fleet. The Watspite got the bright of the first attack. It is said that she became isolated from her consorts and got surrounded by half a dozen sbips. She made a trilliant light. She disposed of more than one of them and by clever maneuxering, showed a clean pair of heels. The other superdreadnaughts retiged to the assistance of the hattle cruisers, which were then faced with the dreadful ordent of meeting battle cruisers, which were then faced with the dreadful orden of the killing unsupported the flower of the German may. It is this phase of the fight which willigo down as one of the meat gallant deeds in British naval blatory. "In naval construction you choose between speed and projection. Baffle cruisers are built primarily for speed and are not included to face up to a prolonged fight scainet heavy armored and heavily guinace chips. Admiral Beatty knew to resist he was to run, but he had to fold the enemy at all costs. He knew the grand feet was not far behind, and he knew what it meant if he could hold un until vice Admiral Sir John Jellicoe strived. What Beatty and his men went Wice Admiral Sir John Jellicoe arrived. What Beatty and this men went through during those hours of inferce no one but thomselves can ever realize. Strong men, physically strong and strong of nerves, men who had looked death in the face in naval actions before shuddhied as they thought of it.

"It was like forty thunderstorms rolled into one," said one of them. "It was as if all the ammunities in Great Britain and Germany had been let off in one buff hour, said another, ""It was hell," was the commonest description of it."

Kept Record of Battle. A correspondent of the Glasgow Herald writes;

"One man of the fleet who was in the thick of it possesses an odd relic of the fight of his own making—a time table of the battle giving the hours of

on the tack of a treasury note.

"It had all the eppearence of one of those elaborate time tables that sporting writers give at the end of their description of some important game; when a dashing three-quarter goes through to score a trilliant 'try' which makes the grand stand description. makes the grand stand rise as one

"At present and doubtless hereafter that treasury note will not be exchang-ed, it is not a scrap of paper with certain monetary value, but a histori-

cal document.

"It was you after I plotock that the hartle opened at a distance of 7,000 to 9,000 yards. The German hoats, hurrying along at full speed, were mere blots on the surface, howing under their rampy of smoke.

"Among the British hattleships which were associated with the buttle cruiser aduadron in the first phase of the figurency forces in the first phase of the first phase

# The Clemson Agricultural: College

south Carolina's school of engineering and agriculture.

One of the largest and best equipped Agricultural and Mechanical Colleges in the South. 1,554 Acres of land. Value of plant over \$1,300,000. Over 120 teachers, officers and assistants. Enrollment, 950. Every county in South Carolina Represented, 13 Degree Courses 4 Short Courses, 26 Departments of instruction. New and Modern buildings, equipment and sanitation.

Religious Influences

The College contributes to the salaries of four resident ministers

who conduct divine services and pastoral work among the cadets in barracks. There is a flourishing Sunday School and Y. M. C. A. with two salaried Secretaries. A \$75,000 Y. M. C. A. Building was completed January 1916.

Cost

The east for any of the twelve

completed January 1918.

## Courses of Study

Agriculture (8 Courses), Chemistry, Mechanical Engineering, Civil Engineering, Textile Engineering, Architectural Engineering, - Four-Weeks Summer Course in Agriculture

in Agriculture.

# DRINK HOT WATER

Hopes every man and woman here will adopt this splendid health habit.

Says a glass of hot water with a teaspoonful of limestone phosphate in it washes poisons from system, and makes one feel clean, sweet and fresh.

Why is man and woman, half the time, feeling nervous, desponachy, dull and unstrung; some days really incapacitated by ill-

If we all would practice the drinking of phosphated hot water before breakfast, what a gratify-ing change would take place. Instead of thousands of half-sick, anaemic-looking souls with pasty, muddy complexions we should see frewds of happy, healthy, rosycheeked people everywhere. The reason is that the human system does not rid itself each day of all the waste it accumulates under our present mode of living. For every ounce of food and drink taken into the system nearly an ounce of waste material must be carried out, else it farments and forms promaine-like poisons in the bowels which are absorbed into the blood.

Just as necessary as it as to clean the askes from the furnace each day, before the fire will burn bright and hot, so we man each

morning clear the inside organs of the previous day's accumulation of indigestible waste and body toxins. Men and women, whether sick or well, are advised to drink each morning, before breakfast, a glass of real hot water with a teaspoonful of lime-stone phosphate in it, as a harmless means of washing out of the stomach, liver, kidneys and bowels the indigestible material, wacie, sour bile and toxins; thus cleansing, sweetening and puri-fying the entire alimentary canal before putting more food into the stomach.

Millions of people who had their turn at constipation, billions attacks, acid stomach, sick head-aches; rheumatism, lumbage, nervous days and sleepless nights have become real cranks about the morning-inside bath. At quarter pound of limestone phosphate will not cost much at the drug store, but is sufficient to demonstrate to anyone its cleansing sweetening and fresheming effect upon the system.
